

Overview

IntelliTrack's **Inventory** is designed to help companies conduct physical inventories and track inventory to its location. Additionally, information about lots and expiration dates of inventory can also be tracked. There is no functionality to receive or issue inventory. All adjustments to inventory are made directly to the on hand quantities or updated as an inventory adjustment upon completion of a physical inventory.

Who uses IntelliTrack's Inventory Solution?

IntelliTrack's **Inventory** is primarily used by companies who want to conduct a quarterly, bi-annual, or yearly physical inventory.

Companies will usually import their item and on hand quantity information from their accounting or business system into IntelliTrack's **Inventory**, conduct a physical, reconcile, and then upload the updated information back to the accounting system. It is also used by some companies who keep a "safety" inventory as in the case of many government contractors who are required to provide reports to agencies showing inventory levels of that same safety stock.

| Part # | Description | Notes |
|------------|---|---|
| 62-001-S1 | IntelliTrack Inventory, networkable | Includes licensing for 1 workstation and 1 batch portable data collection terminal, electronic documentation included. Allows maximum of 5 concurrent workstations. |
| 62-001-S3 | IntelliTrack Inventory, SQL | Includes licensing for unlimited workstations and 3 batch portable data collection terminals, electronic documentation included. |
| 62-001-NAR | IntelliTrack Inventory RF Add-On | Includes licensing for RF portable data collection terminals, electronic documentation included. |
| 62-001-NAW | IntelliTrack Inventory additional 1-user workstation license | Adds 1 additional license for workstation application. |
| 562-001-S1 | IntelliTrack Inventory networkable, one year annual support agreement | One year annual support agreement for Inventory networkable. |
| 562-001-S3 | IntelliTrack Inventory SQL one year annual support agreement | One year annual support agreement for Inventory SQL. |

Features & Benefits of Inventory

| Feature | Benefit |
|--|---|
| Written in Access 2002/XP and includes source code for the workstation application | It is very flexible and completely open. Users can create custom reports, forms, and queries with Access 2002/XP. |
| All fields are user-definable | There is almost no limit as to how you can describe Inventory. |
| Handheld portable scanner support | Conduct quick and accurate physical inventory or move inventory between sites and locations. |
| Items are tracked to a location | You will know exactly what you have and where it is located. |
| Maintains a complete history of an items life cycle | View where an item has been and changes to the inventory count. |
| Serial number, lot tracking, and expiration dates | Very important in many applications such as electronics, pharmaceuticals, laboratories, and others. |
| Print barcodes | Print item, location, and custom barcode labels. |
| Import/Export | Imports or exports ASCII or text data for shared use with other software systems. |
| 12 pre-loaded reports | Gives you meaningful information so you can make informed decisions. |
| Exception reporting | Find out what is missing. Helps you identify shrinkage and maintain an accurate inventory. |
| Reconciliation | Let's you pre-check all of the data prior to updating the main database. This ensures data integrity. |
| Portable time and date stamp | Know when you last moved or inventoried and item(s). |
| Security levels | Username and passwords let you restrict a user to view only access or five other levels of access. |
| Network Support | Let's you deploy the database on a server and access it remotely from your company's LAN. |
| Look-up tables | Helps you maintain consistent data and data integrity. |
| Online help | It is simple and straight forward to operate and understand. You will never be lost with online help. |
| Supports unlimited sites, locations, and items | You can manage an unlimited number of items in an unlimited number of sites and locations. |
